

We can find your dream property

Buying a property in Montenegro become an investment opportunity for many EU and Russia citizens and businesses. Hundreds of properties are being sold day by day across the Montenegro coast. For this very reason we can not list each and all offerings on the pages of Budva Realestate website. If you are interested in buying a property in Montenegro, and especially Montenegro's Coast the best thing you can do is write us an email with description of your desired property. Where you want it to be, Budva , Bay of Kotor , Sveti Stefan etc? Which type of property, is it house, flat, land, are you looking to run a business here and looking for hotel? If you want to buy a house tell us which type of house you are interested in, luxury villa, old stone house, maybe something that you can further invest in and make it to your own likings? Our database consists of more than 1000 Montenegro properties and we believe that we can meet your requirements - the only thing you need to do is to write to info@budvarealestate.com telling us what you want.

Montenegro property prices are still much lower than in other European countries. Realestate market in Montenegro has not been oversaturated yet - not nearly to the extent it happened in Croatia, which gives an excellent opportunity for international investors to secure steady capital growth.
